

Top-Loading Automatic Washing Machine

This automatic washing machine features a 24-hour reservation function and a self-cleaning bucket. The unit has a digital time display and electronic water level control for ease of use.

Overview

Advanced Top-Loading Washing Solution

This top-loading automatic washing machine is designed for efficiency and convenience, featuring a robust, rust-proof plastic shell and a durable stainless steel barrel. It offers advanced cleaning technologies including UV and Ozone sterilization alongside a specialized hand-rub washing action. With user-friendly controls like a 10-segment electronic water level system and a 24-hour reservation feature, it provides a versatile and quiet laundry solution for modern needs.
