

Top-Loading Compact Washing Machine

This compact washing machine utilizes strong water currents for effective cleaning. Its large capacity design is suitable for washing a family's clothes all at once and is also suitable for washing down jackets.

Overview

Compact & Efficient Cleaning

This top-loading washing machine is engineered for efficiency and convenience in smaller spaces. Featuring a durable, rust-proof plastic shell and a hybrid design, it is specifically optimized for various laundry needs, including delicate items like down jackets. With advanced features like violet irradiation sterilization and an air-dry function, it ensures your clothes are clean, fragrant, and ready to wear quickly.

Key Features

Washing Technology

- Eight waterfall strong currents
- Violet irradiation sterilization
- Aromatic sterilization washing
- Air-dried dehydration function

Design & Usability

Large Capacity, Ultra-quiet Operation, Rust-proof Shell, Mobile Four-wheel Design

Technical Specifications

Safety & Stability

- Quad Timer system
- Water separation safety
- Salt water balance ring for smooth dehydration

Material

Durable plastic (rust-proof)
