Product Overview

High-Performance Top Loading Washing Machine

This top loading washing machine offers a robust 9.5kg capacity, perfect for efficient laundry cycles in various environments. Engineered with advanced anti-bacteria nanotechnology and UV light sterilization, it ensures clothes are thoroughly cleaned and hygienic. The unit features an energy-efficient design, durable stainless steel drum, and a protective anti-rat base for increased product longevity.

Technical Specifications

Model Number	XQB95-618M
Washing Capacity	9.5 kg
Spin Capacity	8 kg
Machine Dimensions	580 x 590 x 990 mm

Logistics

Minimum Order Quantity	1x40HQ
Loading Capacity	160

Features

Machine Features

- Automatic balancing
- Electronic display
- Memory wash function
- Rat guard base
- Tempered glass window
- Energy efficient design

Core Technologies

Anti-bacteria Nanotechnology, UV Light Sterilization, Impeller Pulsator, Caress Clothes Technology
