

Touch-Free Automatic Hand Washing Faucet

This automatic induction hand washing faucet offers touch-free operation for enhanced hygiene. Its sleek design incorporates an infrared sensor for precise hand detection and water activation.

Product Overview

Touch-Free Automatic Hand Washing Faucet

This automatic induction hand washing faucet features touch-free operation designed to enhance hygiene standards in any environment. Utilizing advanced infrared sensor technology, it ensures precise hand detection and reliable water activation. Constructed from durable, corrosion-resistant materials, this faucet is engineered for long-lasting performance in both residential and commercial settings, offering an efficient and water-saving solution.

Technical Specifications

Operation Mode	Automatic Induction
Sensor Type	Infrared
Material	Corrosion-resistant metal

Application & Features

Key Benefits

- Touch-free hygiene
- Water-saving design
- Precise detection
- Corrosion-resistant durability

Suitable Environments	Residential, Commercial
