

# Touch-Free High-Speed Hand Dryer

This high-speed electric hand dryer is designed for commercial restroom environments. It features touch-free operation, adjustable airflow, and a hygienic design to minimize the spread of germs, along with a water collection tray.

## Overview

### High-Efficiency Commercial Hand Drying

This high-speed electric hand dryer is engineered specifically for demanding commercial restroom environments. Featuring advanced touch-free operation and adjustable airflow, it ensures a hygienic drying experience that minimizes the spread of germs. Its robust design includes an integrated water collection tray to maintain clean floors, making it an ideal solution for high-traffic facilities such as restaurants, schools, and office buildings.

## Performance

### Performance Features

High-Speed Airflow, Adjustable Airflow

## Features

### Hygiene & Convenience

- Touch-free operation
- Integrated water collection tray
- Anti-drip floor protection

## Applications

### Suitable Environments

Restaurants • Schools • Office Buildings • High-Traffic Restrooms
