

# Touch-Free High-Speed Hand Dryer with HEPA Filter

This high-speed electric hand dryer is designed for commercial restrooms. It features touch-free operation with infrared sensor activation, adjustable air speed and temperature settings, a durable ABS plastic housing, a HEPA filter, and a drip tray to collect excess water.

## Overview

### High-Performance Hygiene Solution

This high-speed electric hand dryer is engineered for demanding commercial restroom environments. Featuring touch-free infrared sensor activation and an integrated HEPA filter, it ensures a sanitary and efficient drying experience. The durable ABS plastic construction and adjustable settings make it a versatile, energy-efficient choice for high-traffic facilities.

## Technical Specifications

### Filtration System

HEPA Filter

### Activation Method

Touch-free infrared sensor

### Housing Material

Durable ABS plastic

## Key Features

### Performance Features

**1 Adjustable**

Air Speed

**1 Adjustable**

Temperature

### Convenience Features
