

Touchless Automatic Hand Washer

This automatic hand washer provides a touchless operation for improved hygiene. Its sleek design incorporates a sensor, making it suitable for both residential and commercial use.

Product Overview

Touchless Automatic Hand Washer

This advanced touchless automatic hand washer provides a hygienic and efficient solution for modern washrooms. Utilizing infrared sensor technology, it ensures completely touch-free operation to prevent cross-contamination. The unit features intelligent micro-computer control that automatically adjusts detection zones, alongside a water-saving design that stops flow immediately after use.

Performance & Technical

Key Performance Metrics

0.05 MPa Min Water Pressure	0.6 MPa Max Water Pressure	20 cm Sensing Distance	60 s Auto Cut-off Time
---------------------------------------	--------------------------------------	----------------------------------	----------------------------------

Operational Specifications

Parameter	Value
Pipe Size	DN15
Ambient Temp	0.1 - 45 °C
Time Delay	0.5 seconds

Power & Efficiency

Power Requirements	4 x 'AAA' size alkaline batteries
Battery Life	Up to 2 years (based on 200 cycles per day)

Features

Core Features

- Infrared sensor operated, touch-free operation
- Advanced energy saving design
- Waterproof sensor
- Battery low LED light indicator
- Integrated strainer to protect solenoid valve
- Long life durable body

Hygiene & Maintenance

Touchless Operation, Bacteria Prevention, Easy Maintenance, Water Saving
