

Touchscreen Induction Cooktop with Wide Voltage Range

This induction cooktop features a touchscreen interface and new energy-saving technology. It has an ultra-wide voltage range and multiple cooking functions.

Overview

High-Performance Induction Cooktop

This advanced induction cooktop is engineered for versatility and reliability, featuring an ultra-wide voltage range of 80V-280V that ensures consistent performance even in regions with unstable power grids. Equipped with 'Smart Eye' technology, it provides real-time monitoring of voltage and power consumption to promote energy efficiency. With a luxurious titanium gold finish and a comprehensive suite of cooking functions, it combines aesthetic appeal with professional-grade culinary capabilities.

Technical Specifications

Operating Voltage Range	80V - 280V
Temperature Control	300 °C
Timer/Presets Range	0-23 hours
Firepower Control	5 stages

Features

Core Technologies

- Ultra-low voltage start technology
- Smart Eye real-time monitoring
- Energy-saving optimization

Design & Finish

Touchscreen Interface • Titanium Gold Car Paint Finish • 4-Digit Digital Display

Cooking Functions

Stir-fry, Barbecue, Hot milk, Boiling water, Cooking rice, Soup/Porridge, Hot pot

Performance Metrics

Performance Highlights

300 °C

Max Stir-fry Temperature

80 V

Minimum Start Voltage
