

Touchscreen Smartphone with QWERTY Keyboard

This smartphone features a touchscreen display and a QWERTY keyboard. The device also includes a front-facing button and a rear camera.

Overview

Versatile Dual-SIM Multimedia Smartphone

This innovative smartphone combines a 3.0-inch touchscreen with a physical QWERTY keyboard and trackball for precise navigation. Designed for global connectivity, it features quad-band GSM support and dual-SIM dual-standby functionality. With integrated G-sensor technology and a high-resolution camera, it offers a comprehensive multimedia experience for professional and personal use.
