

Towable Hydraulic Log Splitter

This log splitter is designed for efficient and reliable wood splitting. It features a robust hydraulic system and is constructed with heavy-duty steel for durability and long-lasting performance.

Overview

Professional Wood Splitting Performance

This towable hydraulic log splitter is engineered for efficient and reliable wood processing in demanding environments. Built with heavy-duty steel construction, it offers exceptional durability for long-term use. The unit is designed for ease of transport with a standard hitch and prioritizes operator safety through a secure two-handed operation system.

Technical Specifications

Engine Power	6.5 HP
Engine Series	3000 Series

Features

Transportation	Towable • Standard Hitch
Safety Features	Two-handed operation

Construction

Build Material	Heavy-duty steel
