Product Overview

Versatile Climate Control Solution

This advanced tower air cooler and heater offers a comprehensive solution for year-round comfort, combining cooling, humidifying, air purification, and heating functions in one sleek unit. Designed for efficiency, it features a powerful 3300W heating element and a reliable 50W cooling system, controlled via an intuitive LED touch screen. With its quiet operation, anion purification, and mobile design, it is an ideal choice for maintaining optimal indoor air quality and temperature in home or office environments.

Technical Specifications

Rated Cooling Power	50 W
Rated Heating Power	3300 W
Voltage/Frequency	220V 50Hz, 110V 60Hz
Wind Speed	8.5 m/s
