

Tower Air Cooling Fan

This tower fan is designed for air circulation and cooling in indoor environments. It features a slim, space-saving design suitable for various room sizes.

Product Overview

Efficient Air Circulation

This tower air cooling fan is engineered with a sleek, space-saving profile that fits seamlessly into both home and office environments. Its vertical grille design ensures optimal airflow distribution to enhance indoor air comfort. Built for stability and ease of use, this unit provides a reliable cooling solution for various indoor spaces.

Technical Specifications

Design Style	Slim tower design
Material	White plastic
Suitable Environments	Home, Office, Indoor

Features

Key Features

- Vertical airflow grilles
- Top-mounted control panel
- Space-saving form factor
- Stable base design
