

Tower Air Purifier for Home Use

This tower-style air purifier is designed for home use. It filters air to improve indoor air quality by removing dust, pollen, smoke, and other airborne particles.

Product Overview

Compact Tower Air Purification

This tower-style air purifier is designed for effective air quality improvement in home environments such as living rooms and bedrooms. It features a multi-stage filtration system including a pre-filter, H13 HEPA filter, and activated carbon filter to capture dust, pollen, and smoke. With integrated UV-C LED technology and smart Wi-Fi control, it offers a modern, tabletop solution for maintaining cleaner indoor air.

Performance Metrics
