

Toy Vacuum Packaging Machine

This vacuum packaging machine is specifically designed for packaging toys, ensuring airtight sealing. It features user-friendly controls for adjusting vacuum pressure and sealing time, accommodating various toy sizes and packaging materials.

Overview

Industrial Vacuum Packaging Solution

This automatic vacuum packaging machine is engineered for high-efficiency product sealing, specifically optimized for items requiring moisture protection. It features an advanced micro-computer control system housed in a waterproof and moisture-proof structure, ensuring long-term reliability and low maintenance. Constructed from high-grade 304 stainless steel, the unit meets strict hygiene standards while offering a unique tilt table design for easy operation with high-moisture content products.

Technical Specifications

Supply Voltage	220 V
Power Consumption	1.2 kW
Packing Speed	1-4 pcs/min
Vacuum Capacity	1-3 kg
Machine Weight	25 kg

Features

Key Advantages

- Micro-computer controller system
- Waterproof and moisture-proof electrical components
- 304 Stainless steel construction
- Tilt table design for moisture retention
- Easy to clean design

Compliance

Hygiene Compliance	Food Grade 304 Stainless Steel, Waterproof Design
