

Track-Mounted Mobile Cone Crusher

This hydraulic-driven, track-mounted mobile plant is a self-contained crushing and screening unit. It features a cone crusher for secondary or tertiary crushing, a vibrating feeder, and a discharge conveyor.

Product Overview

High-Efficiency Mobile Crushing Solution

This track-mounted mobile cone crusher is a versatile, self-contained unit engineered for secondary and tertiary crushing operations. Designed for maximum mobility and rapid deployment, it is an ideal solution for mining, quarrying, and large-scale construction projects. The integrated system combines a high-performance cone crusher, a controlled vibrating feeder, and an efficient discharge conveyor to ensure seamless material processing on-site.

Technical Specifications

Chassis Type

Track-Mounted • Mobile

Model Identifier

YG935E69L

Power System

Diesel Engine

Key Features

Integrated Components

- Cone Crusher
- Vibrating Feeder
- Discharge Conveyor
- Integrated Control Panel

Application

Suitable Industries

Mining, Quarrying, Construction
