

Tracked Snow Blower with 71cm Working Width

This tracked snow blower is designed for efficient snow removal in various conditions. With a 71cm working width and a caterpillar drive, it effectively clears snow from driveways, walkways, and other surfaces.

Overview

High-Performance Tracked Snow Blower

This professional-grade tracked snow blower features a robust 71cm working width designed for efficient clearing in challenging conditions. Equipped with a heavy-duty caterpillar drive system, it ensures zero-turn maneuverability and superior traction on uneven terrain. The unit offers flexible power options with 11HP or 13HP engines and includes both electric and AC start modes for reliable operation in extreme cold.
