

Tractor Brake Gear Shaft 3C001-48460

This brake gear shaft is designed as a spare part for Kubota M7040 tractors. The component ensures reliable braking performance and precise gear engagement.

Product Overview

High-Performance Brake Gear Shaft

This precision-engineered brake gear shaft is a critical component for agricultural tractor braking systems. Designed to meet or exceed original equipment manufacturing standards, it ensures reliable gear engagement and consistent performance under demanding conditions. Built for longevity and durability, this part is an essential choice for maintenance and repair, helping to restore optimal function to tractor transmission and braking mechanisms.

Technical Details

Detailed view of the brake gear shaft designed for precise fit and reliability in tractor braking systems.

Part Number	3C001-48460
Component Type	Brake Gear Shaft
Application	Agricultural Machinery

Compatibility

Compatible Tractor Models	M7040
