

Tractor Clutch Disc Assembly

This clutch disc assembly is designed for Kubota tractors. It is compatible with M6040 and M5000 models.

Product Overview

High-Performance Clutch Disc Assembly

This clutch disc assembly serves as a critical component in tractor transmission systems, engineered for reliable power engagement and disengagement. Featuring a robust design with high-durability friction materials and vibration-dampening springs, it is built to handle demanding agricultural workloads. This part ensures smooth operation and extended service life, maintaining optimal machinery efficiency.

Technical Details

Precision-engineered clutch disc assembly for optimal power transmission.

Key Features

- Torsional vibration dampening springs
- High-durability friction material segments
- Precision-engineered central hub
- Designed for heavy-duty agricultural use

Part Number

3A272-25130

Compatibility

Compatible Tractor Models

M6040, M5000, M9000, M8200
