

Tractor Fluid Separator for Kubota M6040

This fluid separator is designed for use in Kubota M6040 tractors. It effectively removes contaminants from fluids, ensuring the tractor's systems operate efficiently and reliably.

Product Overview

High-Performance Separator Component

This fluid separator is specifically engineered for compatibility with high-capacity tractors. Designed for durability in demanding agricultural environments, it effectively manages fluid contaminants to protect engine and hydraulic system integrity. The component ensures seamless integration, helping to maintain machine uptime and long-term operational reliability.

Compatibility

Compatible Tractor Models

M6040, M5000, M7040, M8540, M9540, M9000, M105, M1304

Application

Wheel Tractor Spare Parts

Technical Features

Essential components kit designed for separator system maintenance and repair.

Key Features

- Contaminant separation for fluid systems
- Precision-engineered for seamless installation
- High-durability construction for heavy-duty use
- Optimized for maintenance and repair kits

Material Quality

Industrial-grade • High-Durability
