Overview

The 3W series sprayer features a robust red frame and a high-capacity tank for uniform liquid application.

Versatile Tractor-Mounted Spraying Solution

The 3W series suspension boom sprayer is a highly flexible and easy-to-operate solution designed for wheeled tractors. It is engineered for the efficient application of pesticides, fertilizers, and herbicides across various agricultural landscapes. Featuring a robust anti-corrosion mechanical pipeline and a stable parallel-bar diaphragm pump, this sprayer ensures long-term durability and consistent pressure for professional farming needs.

Performance & Build

Key Features

- Suitable for wheeled tractors
- Anti-corrosion material pipeline
- Parallel-bar diaphragm fluid pump
- Adjustable spray rod height
- Folding sprayer stem type

Pump Flow Rate

90 L/min

Min Flow

120 L/min

Max Flow

Nozzle Technology

Combined type anti-drop nozzle

Model Comparison

Technical Specifications by Model

Model	Volume (L)	Width (M)	Nozzles (pcs)
3W-400	400	6	12
3W-600	600	8	16
3W-800	800	10	20
3W-1000	1000	12	24
3W-1200	1200	14	28

Applications

Primary Applications

Pesticide Application, Fertilization, Weeding
