Overview

Professional Tractor Mounted Disc Plough

This high-performance tractor-mounted disc plough is engineered for superior soil preparation and cultivation in challenging conditions. Featuring a fully-suspended design, it is ideal for land with weeds, stalks, and frictional soil containing debris. The rotary motion of the discs ensures efficient soil turning and residue incorporation, preventing grass winding and blockages for consistent, high-quality results.

Technical Specifications

Operational Performance

250 mm

Minimum Working Depth

300 mm

Maximum Working Depth

40 hp

Minimum Power Requirement

120 hp

Maximum Power Requirement

Model Specifications

Model	Working Width (mm)	Discs	Total Weight (kg)
1LY-2	600	2	350
1LY-3	900	3	400
1LY-4	1200	4	470
1LY-5	1500	5	560

Linkage System

Three-point suspension II type

Key Features

Design Advantages

- Rotary disc motion for effective soil turning
- Anti-clogging performance in weedy or stalk-heavy land
- Adjustable disc angle for custom tillage requirements
- Easy crop stalk cutting capability
