Product Overview

Professional Soil Tillage Solution

The Tractor-Mounted Disc Plough features a durable round pipe frame designed to withstand challenging field conditions. It is specifically engineered to handle land containing weeds, stems, and frictional soil with small debris without clogging. By utilizing independently rotating hardened steel discs, this implement ensures efficient soil aeration and residue burial for superior seedbed preparation.

Technical Features

Operational Advantages

- Non-winding grass design prevents blockage
- High-efficiency cutting of stems and roots
- Minimized working resistance for fuel efficiency
- Adjustable disc angle and depth
- Integrated scrapers to prevent soil buildup

Compatibility & Mounting

4-wheel tractor compatible, 3-point linkage system, Primary tillage

Construction

Design Specifications

Component	Description
Frame Type	Heavy-duty round pipe
Disc Material	Hardened steel
Mounting	3-point hitch
Control	Adjustable furrow width and depth
