

Tractor-Mounted Four-Row Precision Corn Seeder

This tractor-mounted corn seeder precisely plants seeds in four rows. It is designed to save seeds by planting single or double seeds as needed.

ADDITIONAL IMAGES

Overview

Precision Corn Seeding Technology

This tractor-mounted precision seeder is designed for high-efficiency single or double particle planting, significantly reducing seed wastage. It performs multiple operations in a single pass, including furrowing, fertilizing, seeding, covering, and pressing. Ideal for modern agricultural operations, it ensures uniform plant spacing and optimal germination rates for maximum yield.

Key Performance Metrics

Key Performance Metrics

4

Seeding Rows

30 hp

Required Power

245 kg

Total Weight

Technical Specifications

Linkage System

Three-point suspension Type I

Working Depth

100 mm

Row Spacing Range

500-620 mm

Planting Distance

120-320 mm

Series Comparison

Model Specifications Table

Model	Rows	Power (hp)	Weight (kg)
2BGYF-2	2	15	140
2BGYF-3	3	20	185
2BGYF-4	4	30	245
2BGYF-5	5	40	310
2BGYF-6	6	50	370
2BGYF-7	7	60	470

Operational Advantages

Operational Features

- Single or double particle precision planting
- Simultaneous crystalline granule fertilizer application
- Integrated furrowing and earth covering
- Adjustable row spacing and planting depth
- Robust frame for high stability during operation

Tractor Compatibility

15-80hp Tractors, Four-wheel Tractors, 3-Point Hitch
