Overview

Tractor Mounted Offset Disc Harrow

This tractor-mounted offset disc harrow is designed for efficient soil preparation, specifically for cleaning crop residue, breaking hardened soil, and leveling land. Featuring robust construction with 65Mn spring steel blades, it is highly effective for heavy clay, waste land, and weedy fields. The adjustable working depth and offset configuration ensure thorough soil cutting and mixing, making it an ideal tool for small-scale farming operations.

Technical Specifications

Blade Material	65Mn spring steel
Linkage Type	Three-point suspension I type, Three-point suspension II type
Working Depth	120 mm

Performance Models

Model Specifications

Model	Working Width (mm)	Disc Quantity	Weight (kg)	Matched Power (hp)
1BQX-1.1	1100	12	200	15
1BQX-1.3	1300	14	220	18
1BQX-1.5	1500	16	240	25
1BQX-1.7	1700	18	260	40
1BQX-1.9	1900	20	310	50
1BQX-2.3	2300	24	360	60

Key Features

Main Features

- Adjustable working depth
- Scraper fitted for each disc blade
- Strong and durable bearing assembly
- Offset configuration for better soil penetration
- Suitable for 15-60hp tractors
