Product Overview

Heavy-Duty Topper Mower

This tractor-mounted topper mower is engineered for efficient vegetation management, including cutting grass, weeds, and light brush in pastures and fields. Built with a robust graphite casting iron gearbox and reinforced plates, it offers enhanced durability for demanding agricultural tasks. The design features a universal 3-point linkage system and adjustable settings, ensuring stable operation and a clean, consistent cut.

Design & Durability

Construction Advantages

Feature	Benefit
Graphite Casting Iron Gearbox	Better material performance and durability
Adjustable Rear Wheel	Prevents tail sinking and adjusts cutting height
Thicker/Heavier Blades	Increased cutting efficiency and impact resistance
