

Tractor Trailed Hydraulic Disc Harrow for 80-100hp Tractors

This hydraulic disc harrow is designed for use with 80-100hp tractors. It features a wide working width and a high-quality oil cylinder for optimal performance.

Overview

Heavy-Duty Hydraulic Disc Harrow

The 1BZ series hydraulic heavy disc harrow is engineered for demanding agricultural tasks, including breaking up hardened clay soil, clearing waste land, and managing weedy fields. It serves as an efficient alternative to traditional plowing, capable of stubble cleaning, soil aeration, and land leveling in a single pass. Designed for durability and performance, this trailed implement features a robust structure and a hydraulic system for easy transport wheel operation.

Technical Specifications

Linkage Type	Trailed
Trailed Hole Diameter	38 mm
Hydraulic System	Difunctional oil cylinder, 1/2" threaded oil connection
