

Tractor Transmission System

Heavy-duty tractor transmission designed for robust performance and durability. Features a multi-gear configuration for optimal power delivery and speed control.

Product Overview

Robust Transmission Engineering

This heavy-duty tractor transmission is engineered to provide reliable performance in the most demanding agricultural environments. Featuring a multi-gear configuration, it allows for optimal power delivery and precise speed control across various field conditions. Its high-strength material construction ensures long-lasting service and exceptional durability for professional operations.

Technical Specifications

Suitability

- Demanding agricultural use
- Harsh operating conditions

Construction

Heavy-duty, High-strength materials, Durable casing

Gear System

Manual selection via gear shift lever
