Product Overview

Professional Traffic Calming Solution

This rubber speed hump is engineered to effectively manage vehicle speeds in high-traffic environments such as parking lots, roadways, and private lanes. Crafted from a durable vulcanized rubber blend, the unit is resistant to weathering, moisture, oil, and extreme temperature fluctuations. Its modular design allows for custom lengths using 250mm or 500mm sections, ensuring a perfect fit for any road width while maintaining compliance with Australian safety standards.

Technical Specifications

Available Section Lengths

- 250mm
- 500mm

Material

Vulcanized Rubber

Color

Black, Yellow

Compliance

Australian Standard 2890.1:2004

Features & Benefits

Product Highlights

UV Resistant • Moisture Resistant • Oil Resistant • Weather Resistant • Modular Design

Visibility Systems

- Molded yellow stripes
- Embedded glass reflectors
- Cat eye reflectors
