

Traffic Cones for Road Safety

Durable traffic cones are designed for road safety and effective traffic management. These cones are made from high-quality, impact-resistant plastic, featuring a bright orange color and a reflective white band for enhanced visibility.

Product Overview

Professional Traffic Management Solutions

These durable traffic cones are engineered for high-visibility road safety and effective traffic management. Constructed from impact-resistant plastic, they are built to withstand demanding environments like construction zones and parking lots. The design prioritizes stability and visibility, ensuring reliable performance in various weather conditions.

Technical Specifications

Design Features

- Wide base for stability
- Impact-resistant construction
- Weather-resistant design

Material	Impact-resistant plastic
Visibility Features	High-visibility orange, Reflective white band

Usage & Applications

Recommended Applications

Construction Zones • Parking Lots • Temporary Traffic Control
