

Trailer Leaf Spring Suspension

This multi-leaf spring is engineered for trailer suspension systems, offering both load support and damping. Constructed from high-strength steel, it provides progressive stiffness and enhanced durability.

Product Overview

Heavy-Duty Suspension Solutions

These trailer leaf springs are engineered with over 58 years of manufacturing expertise to provide reliable load support and damping for commercial applications. Constructed from high-strength steel materials like SUP7, SUP9, and SUP11, these springs offer progressive stiffness and enhanced durability. Designed for heavy-duty towing, they ensure stable performance under varying load conditions and can be customized to specific technical drawings or requirements.

Technical Specifications

Available Materials	SUP7, SUP9, SUP11
Model Identifier	HU28-SF-02-2013

Commercial Terms

Annual Supply Capacity

25000 Tons

Min Annual Capacity

30000 Tons

Max Annual Capacity

Accepted Payment Terms

L/C • T/T

Minimum Order Quantity	5 Tons
Delivery Time	10-25 days
Packaging Standard	Pallets
