

Transparent Film Overwrapping Machine

This high-speed, automatic machine is designed for three-dimensional packaging of products using transparent film. It provides precise and efficient wrapping, ensuring product protection and an enhanced visual appearance.

Product Overview

Professional 3D Transparent Film Overwrapper

This high-performance overwrapping machine utilizes BOPP, PVC, or OPP film to provide professional-grade, three-dimensional packaging. Designed for reliability across multiple industries, it features a hot-sealing mechanism and integrated easy-opening pull tape capabilities. It is an ideal solution for packaging pharmaceuticals, cosmetics, food items, and stationery with a high-quality, tamper-evident finish.

Technical Specifications

Production Capacity

80 packages/min
Max Output

Power Requirements

0.75 KW
Motor Power

4 KW
Heating Power

Electrical Input: 220V / 50Hz AC

Model ID: BT-200B

Packaging Capabilities

Supported Box Dimensions

Dimension	Range
Length	40-160 mm
Width	20-100 mm
Height	10-40 mm

Compatible Film Materials: BOPP, PVC, OPP
