

Transparent Medical Face Shield

This transparent face shield offers full facial protection against splashes and sprays. It is suitable for use by medical staff and complies with standard GB148866-2006.

Product Overview

Professional Medical Protection

This medical-grade face shield is engineered from high-clarity APET material to ensure optimal visibility and protection. Featuring dual-sided fog resistance and anti-static properties, it provides a reliable barrier against bodily fluids, sprays, and chemical splashes. Its design prioritizes wearer comfort through lightweight construction and non-allergic forehead padding, making it ideal for medical, dental, and laboratory environments.

Material and Safety
