

# Trapezoidal Sheet Roll Forming Machine

The Trapezoidal Sheet Roll Forming Machine is engineered for the efficient production of trapezoidal profile roof sheets. It is designed for high-volume manufacturing, ensuring consistent quality and precise dimensional accuracy.

## Product Overview

### High-Efficiency Trapezoidal Sheet Forming

This industrial-grade roll forming machine is engineered for the precise production of trapezoidal roof and wall panels. Designed for high-volume manufacturing environments, it combines robust construction with reliable forming speed to ensure consistent dimensional accuracy. It is a versatile solution for steel construction projects requiring durable roofing materials.

## Technical Specifications

### Machine Dimensions

**6600 mm**

Length

**1400 mm**

Width

**1300 mm**

Height

### Power Requirements

**5.5 kw**

Power

**380 V**

Voltage

## Performance

|                     |  |
|---------------------|--|
| <b>Making Speed</b> | 10 m/min                                   |
| <b>Application</b>  | Roof Panel, Wall Panel, Steel Construction |

## General Information

### Condition

New

### Warranty & Support

- 1-year warranty
- Engineers available for overseas service

### Certifications

BV
