

Trapezoidal Utility Knife Blades

These trapezoidal blades are suitable for use in utility knives and various cutting tools. Constructed from hardened steel, they offer durability and precise cutting performance.

Product Overview

Professional Trapezoidal Utility Blades

These trapezoidal utility knife blades are engineered for precision and durability in professional cutting environments. Constructed from hardened steel, they offer exceptional edge retention and resistance to wear. Featuring a versatile design with multiple mounting holes and a notched top edge, these blades ensure secure fitment and controlled snapping for various utility knife applications.

Technical Specifications

Mounting Features

- Central large circular hole
- Lateral adjustment holes
- Notched top edge

Key Benefits

Hardened Steel • Adjustable Mounting • Precision Cutting • Durable

Blade Shape	Trapezoidal
Material	Hardened Steel
