Product Overview

High-Performance Trenching Solutions

This high-performance mud and slag removal hose is engineered specifically for the rigorous demands of trench cutter applications. Designed for heavy-duty construction and mining environments, the hose ensures efficient material transfer while maintaining durability under high pressure. Its robust construction provides excellent resistance to abrasion and chemical exposure, helping to minimize operational downtime.

Technical Specifications

Compatible Equipment

- Trench Cutters
- Heavy-duty Excavation Machinery
- Slag Removal Systems
- Mud Transfer Systems

Key Features

High Abrasion Resistance • Chemical Resistant • High Pressure Rated • Heavy-Duty Construction

Certifications

ISO 9001
