

Triangle Chain Hoist Block

This triangle chain hoist block is designed for lifting applications. It features high-strength steel components and a smooth-running gear system for reliable operation.

Product Overview

Triangle Chain Hoist Block

The HSZ series triangle chain block is a robust lifting device engineered for durability and reliable performance in industrial environments. Constructed with high-quality steel components, including alloy steel hooks and gears, this hoist ensures structural integrity and safety. Its design features a specialized triangular configuration that optimizes load distribution, making it an ideal solution for construction, manufacturing, and maintenance tasks.

Technical Specifications

Type	Lifting Block
Drive Type	DC
Running Mode	Stationary
Structure	Bridge Crane
Installation	Truck Crane
Work Level	Light Level
Application	Port Crane

Construction & Materials

Material Composition

- High quality steel structural parts
- 35CrMo Alloy steel hooks
- 20CrMnTi Alloy steel gears

Key Features

Antiseptic, Heat Treated Components, Safety Latches, Hollow Structure
