

Triangular Electronic Component Connector

This triangular electronic component is a specialized connector for electronic circuits. It features a metallic insert with a central hole for mounting.

Product Overview

Precision Triangular Connector

This specialized electronic component features a distinct triangular form factor, engineered for integration into complex electronic circuits or machinery. It includes a precision-machined metallic-colored insert with a central mounting point for secure connection. Designed for reliability in professional industrial applications, this component serves as a robust adapter for high-precision assembly needs.

Technical Specifications

Construction Details

- Metallic-colored central insert
- Integrated central mounting hole
- Precision-engineered design

Geometric Form	Triangular
Component Category	Electronic Connector, Adapter, Industrial Hardware
