

Tribrach Adapter for Surveying Instruments

Precision tribrach adapter designed for use with surveying instruments. It features a robust construction for stability and accuracy in the field.

Product Overview

Precision Tribrach Adapter

This precision tribrach adapter is engineered to provide a stable and accurate foundation for various surveying instruments. Designed for demanding field conditions, it features robust construction to ensure reliable performance during critical measurements. The unit is equipped with integrated leveling screws, allowing for precise instrument setup and alignment in any environment.

Technical Specifications

Key Features

- Precision leveling screws
- High-stability base
- Universal instrument compatibility

Construction

Robust heavy-duty design

Compatibility

Surveying Instruments, GPS Equipment, Field Measurement
