

Tricolor Plastic Drinking Straw Extrusion Machine

This tricolor drink straw extrusion machine is designed for the continuous production of multi-colored plastic drinking straws. It features a robust extrusion system with precise temperature control and adjustable extrusion speed to ensure consistent straw diameter and wall thickness.

Product Overview

High-Efficiency Production

This tricolor drink straw extrusion machine is designed for the continuous, high-volume production of multi-colored plastic drinking straws. It features a robust extrusion system with precise temperature control and adjustable speed to ensure consistent straw diameter and wall thickness. Engineered for versatility, it supports the manufacturing of straight, flexible, and spoon-style straws with vibrant tricolor patterns.

Technical Specifications

System Components

- Robust extrusion system
- Precise temperature control
- Color blending unit
- Rapid cooling system
- Integrated cutting unit

Production Capabilities

Straight Straws, Flexible Straws, Spoon Straws, Tricolor Patterns

Operations and Safety

Safety Standards

Emergency Stop Buttons • Protective Guards

Control System

User-friendly control panel for monitoring production parameters
