

Tricycle Tire - Robust Tread, Enhanced Grip

This tricycle tire is designed for optimal performance and durability. It features a robust tread pattern that provides enhanced grip and stability on various surfaces.

Product Overview

Rugged Performance for Tricycles

The TH-609 tricycle tire is engineered with a specialized horizontal groove pattern to deliver exceptional traction across diverse road conditions. Its super-strong body structure provides superior load capacity, making it an ideal choice for heavy-duty commercial or industrial tricycle applications. Designed for long-lasting wear resistance and stability, this tire ensures reliable handling and safety in demanding environments.

Technical Specifications

Tread Pattern	TH-609
Size	4.50-12

Features

Road Suitability

- Paved roads
- Unpaved surfaces
- All-terrain conditions

Key Attributes	Horizontal Groove, High Load Capacity, Wear Resistant, Enhanced Traction
