

Tricycle Tire - TH-610

The TH-610 tricycle tire is engineered for durability and optimal performance on three-wheeled vehicles. Its robust construction ensures a long lifespan, while the tread pattern provides excellent grip and stability on various road surfaces.

Product Overview

Rugged Performance for Tricycles

The TH-610 tricycle tire is engineered to provide superior durability and reliability for three-wheeled vehicles. Its robust construction is designed to withstand heavy-duty use in both commercial and personal applications, ensuring safety and performance. With advanced features like stabbing and tear resistance, this tire delivers consistent traction and longevity on a wide variety of road surfaces.

Technical Specifications

Tread Pattern	Horizontal groove pattern
Tire Size	5.00-12

Key Features

Performance Attributes

- Super strong body structure
- Excellent grip
- Good traction
- Great load capacity
- Suitable for all road conditions

Resilience Characteristics

Stabbing resistance, Cutting resistance, Tear resistance, Wear resistance
