

Triple Chainring Crankset with Chain Guard

This bicycle crankset features multiple chainrings for varied riding conditions. It includes a protective chain guard, preventing clothing from getting caught in the drivetrain.

Overview

Versatile Triple Crankset

This triple chainring crankset is engineered for hybrid and mountain bike applications, providing a versatile range of gear ratios to handle varied riding conditions. The design prioritizes efficient power transfer, ensuring reliable performance across different terrains. It also features an integrated protective chain guard, which effectively prevents clothing from snagging in the drivetrain while maintaining a clear view of the mechanical components.

Technical Specifications

Safety Features

Chain Guard Included

Design Focus

- Efficient power transfer
- Protective clear plastic guard
- Multi-gear versatility

Drivetrain Configuration

Triple Chainring

Compatible Bike Types

Hybrid Bike, Mountain Bike
