

Triple Gang Decorator Wall Plate

This triple gang decorator wall plate fits three decorator-style switches or outlets. It is constructed from durable polycarbonate material for high impact resistance.

Overview

Durable Triple Gang Wall Plate

This triple gang decorator wall plate is engineered from high-quality, durable GE polycarbonate, providing exceptional resistance to impact, abrasion, and environmental stressors like grease, oils, and moisture. Designed for both residential and commercial high-abuse environments, it features a smooth, easy-to-clean finish that resists dust accumulation. The plate includes captive screws for quick installation and rounded edges to ensure safety and prevent wall damage.
