

Triple System Computerized Flat Knitting Machine

This industrial computerized flat knitting machine features a triple carriage system for enhanced productivity. It is designed for manufacturing a wide range of knitted fabrics with precision and efficiency.

Product Overview

Industrial Knitting Precision

The GSJX-3-60 is a high-performance computerized flat knitting machine engineered for demanding industrial environments. Featuring a triple carriage system, it offers superior productivity and exceptional versatility for complex textile patterns. This advanced equipment ensures high-precision stitch control, making it an ideal solution for manufacturers seeking to scale high-quality production efficiently.

Technical Specifications

Carriage System	Triple System
Model Number	GSJX-3-60
Control Capabilities	Computerized Pattern Programming, Precision Stitch Control

Performance

Suitability

High-Volume Production • Industrial Grade
