

Triplex Mud Pump Component

This high-precision component is designed for triplex mud pumps. It is constructed from durable metal alloy, ensuring resistance to wear and corrosion in demanding drilling environments.

Product Overview

High-Performance Mud Pump Solutions

This triplex mud pump component is engineered to meet or exceed rigorous API-7K international standards, ensuring optimal compatibility and performance in demanding drilling environments. Constructed from durable, wear-resistant metal alloys, it provides reliable integration into a wide range of industrial pump assemblies. These components are designed to withstand the harsh conditions of oil, gas, and geothermal exploration, offering an extended service life for professional drilling operations.

Standards & Quality

Industry Certifications	API-7K, OEM Exchangeable
-------------------------	--------------------------

Compatibility

Compatible Pump Models

Manufacturer	Model Series
NATIONAL	7P-50, 8P-80, 9P-100, 10P-130, 12P-160, 14P-220
EMSCO	F-350/500/650/800/1000, FB-1300/1600
IDECO	T-500/800/1000/1300/1600
GARDNER DENVER	PAH, PZ-7/8/9/10/11
OILWELL	A-850-PT, A-1100-PT, A-1400-PT, A-1700-PT

Technical Specifications

Part Reference	7K-0448
