

Triplex Mud Pump Liner with Ceramic Sleeve

This triplex mud pump liner features a high-strength alloy steel outer hull with a ceramic inner sleeve. It offers enhanced resistance to heat and corrosion.

Product Overview

High-Performance Mud Pump Liners

These triplex mud pump liners are engineered for demanding drilling applications, offering exceptional wear resistance and extended service life. Each unit is constructed with a high-strength alloy steel outer hull and a precision-honed zirconia ceramic inner sleeve for optimal hydraulic efficiency. Designed to meet or exceed API-7K standards, these components ensure reliable operation under high-pressure and abrasive conditions.

Technical Specifications

Material Composition

- High-strength alloy steel outer hull
- Zirconia ceramic inner sleeve
- High chrome alloy inner sleeve option

Compliance

API-7K

Performance Features

Key Advantages

Mirror finish honing • High-pressure design • Slippage prevention • OEM interchangeable
