

# Triplex Mud Pump Valve Replacement Part

This triplex mud pump valve is made of durable materials. It is designed to meet or exceed API-7K standards and is exchangeable with OEM products.

## Product Overview

### High-Performance Mud Pump Components

These replacement valve and seat assemblies are engineered for high-pressure drilling environments, offering superior performance and longevity. Constructed from high-strength alloy steel with a deep carburized wear surface, they are designed to meet or exceed stringent API-7K standards. The stem-guided valve configuration ensures optimal flow and durability, making them a reliable choice for professional pumping operations.

## Technical Specifications

### Standards

API-7K

### Material Construction

High strength alloy steel with deep carburized wear surface

### Design Type

Stem guided, 3/4 Web, Full Open

## Compatibility & Support

### Included Components

- Valves
- Seats
- Valve Inserts
- Valve Springs

### Compatibility

Yes
