Overview

High-Performance Cooling Solution

This tripod stand fan is engineered for reliability and efficient air circulation in demanding environments, including warehouses, power areas, and large outdoor spaces. It features an effectively enclosed motor design that ensures safety and longevity by protecting internal components from dust and debris. The optimized four-blade ABS structure delivers powerful airflow while maintaining low noise levels, making it a versatile choice for professional cooling needs.

Technical Specifications

Motor Type	Enclosed Motor
Speed Settings	3
Blade Material	ABS
Number of Blades	4

Features

Design Benefits

- Low noise operation
- Space-saving foldable tripod base
- Adjustable height for customized positioning

Safety Features

Over-heat Protection, Enclosed Motor

Applications

Suitable Environments

Power Areas • Warehouses • Large Outdoor Spaces • Office • Home
