

Truck and Bus All-Position Tire

This is an all-position tire designed for trucks and buses. It features super wear resistance for extended service life.

Product Overview

Professional Performance All-Position Tire

This radial truck and bus tire is engineered for long-haul and regional applications, featuring a durable casing designed for retreadability and extended service life. The optimized tread pattern and enhanced sidewall protection ensure even wear and resistance to impact damage. Designed for commercial vehicles, it provides reliable handling and traction in both dry and wet road conditions.

Technical Specifications

Tire Size	10R22.5
Load Index	146/143
Speed Rating	L
Construction Type	Radial, Tubeless

Key Performance Metrics

Features & Benefits

- Enhanced tread compound
- High scrub resistance under regional operation
- Wear performance and mileage

- Strong closed shoulder ribs
- Prevent irregular shoulder wear due to cornering and handling
- Even wear and longer life

- Special sipe design
- Excellent traction resistance even wet road condition
- Excellent handling even wet road condition

Detailed breakdown of tread compound benefits, shoulder design, and sipe engineering for improved handling.

Performance Highlights

- Enhanced tread compound for high scrub resistance
- Strong closed shoulder ribs to prevent irregular wear
- Special sipe design for superior wet traction
- Durable casing optimized for retreading
