

Truck and Bus Transport Flatcar

This flatcar is specifically designed for the transportation of trucks and buses. It features a long, flat platform with wheelsets at both ends for railway transport.

Product Overview

Professional Flatcar Transport Solution

The KTTX-4848 flatcar is a specialized railway vehicle engineered specifically for the efficient long-haul transport of heavy-duty trucks and buses. Its robust, elongated platform design ensures maximum stability and space utilization for large-format cargo. This platform is ideal for logistics operators seeking a reliable rail-based solution for cross-country automotive freight.
